Are happy to invite you to the

7TH SWISS NARCOLEPSY DAY

20/01/2022 | LIVE FROM LUGANO[™]

Ente Ospedaliero Cantonale

Swiss Narcolepsy Network

Dear Colleagues

Asleep during the day! A growing number of normal population suffer severely from daytime sleepiness. In some cases this is caused by narcolepsy - a rare and compromising, still underdiagnosed and not well understood disorder.

The 7TH Swiss Narcolepsy Day offers opportunities to address clinical aspects of narcolepsy and to report on scientific progress in disease management.

Together with the newly founded Swiss Narcolepsy Network (www.snane.ch) our goal is to find innovative new strategies that support the improvement of the patient's medical care.

Warm Regards,

Prof. Dr med MAURO MANCONI

Head of the Sleep Medicine Unit
Neurocenter of Southern Switzerland
Regional Hospital of Lugano
Università della Svizzera Italiana
Dpt of Neurology, University of Bern

EVENT FORMAT

Due to the current Covid-19 pandemic and related national restrictions, the Board has decided to convert the meeting into a full virtual meeting, welcoming speakers onsite and allowing attendees to join the entire meeting online through a dedicated platform.
